

CORE IDEALS OF AMERICAN SOCIETY

In which of our national document(s) (Declaration of Independence, Constitution, etc...) can you find the core ideal __Individual rights__?

You can find individual rights in the constitution.

As a society today, or throughout our history, explain how have we moved toward and/or away from that ideal.

We moved toward individual rights because everyone doesn't just believe in the same thing. Everyone believes in different religions like you could be catholic, methodist, or a christian Its not all one religion its a whole bunch of different religions. Another reason that we have moved toward individual rights is because not every one has the same hair cut some peoples hair is long and some peoples are short. One last reason for why everyone has moved toward individual rights is because not everyone has the same pets not every one has a dog or a cat or even a rat for that matter because some people are allergic to pets and they cant have them also some people absolutely hate animals.
